

ABSTRACT OF THE DISCLOSURE

A function restricting program capable of effecting minute security setting is disclosed. Based a security policy containing inhibited process designating information defined
5 as information for designating some processes of which executions are not permitted with respect to one or more caption character strings, the program makes the computer operate as a device that does not execute respective processes of which executions are not permitted by inhibited process
10 designating information contained in security policy information with respect to a caption character string coincident with a title character string of the function restricting target window in a case where the function restricting target window of which the title character string
15 is coincident with any one of caption character strings in the security policy information, is displayed on the display device.
